

Performance

Technical Information

Features

Absorption Range: 350 Hz to 5000 Hz
Acoustic Class: A | (α_w) = 0,9

This product is available in the following Fire Rate:
FR | Fire Rated*

PRODUCT COMPOSITION:

- Moritz | Polyethelene Foam (FR)
- Reversible: Closed Cell | Open Cell
- Euroclass B s1,d0

Dimensions:

FR | 800x1184x40mm | 1.15 Kg

Moritz is a durable, semi-rigid closed-cell foam. It has an internal honeycomb-like structure that grants it exceptional performance. It is used to reduce reverberation or create a noise barrier in practically any type of environment, from high humidity areas such as swimming pools or outdoor spaces, to the most extreme high wear situations that require resistance to most chemicals and solvents, commonly found in healthcare environments or the manufacturing and service industries. Moritz is integrally fire retardant. Moritz panelling can be reversed to expose either an open-cell structure, that boosts high-frequency absorption, or closed-cell structure, for when the panel needs to be easily cleanable. Moritz is lightweight and self-supporting. It is easily installed with fasteners or adhesive and can be cut to size on site.

Product finishes

(FR) Product Fire Grade - Fire Rated

FR | (F04) Bianco | One Side Open Cell, Other Side Closed Cell

FR | (F05) Nero | One Side Open Cell, Other Side Closed Cell

Moritz - Panelling

Acoustic washable foam

Purpose

- RT reduction
- Improving speech intelligibility
- High-frequency absorption
- Reducing excessive reverberation

Recommended for

- Industrial noise control
- Sanitary or harsh environments
- High humidity environments
- Outdoor spaces

Fixing Systems

Wall & Ceiling
